

Gandikota Hemanjali Bhavani

Eluru, Andhra Pradesh, India | 9347956469 | hemanjali35@gmail.com | LinkedIn | GitHub

Professional Summary

B.Tech **Artificial Intelligence and Machine Learning** student seeking an entry-level **Software Development Engineer** role. Strong foundation in **Python, Java, Data Structures and Algorithms, Object-Oriented Programming, SQL**, and problem solving, with hands-on experience in **machine learning, REST API** development, and deploying web applications.

Education

Ramachandra College of Engineering, Vatluru <i>B.Tech – Artificial Intelligence and Machine Learning (Pursuing)</i>	2023 – 2027 CGPA: 8.91
NRI Junior College, Eluru <i>Intermediate</i>	2021 – 2023 CGPA: 94.1
St. Augustine's EM High School, Pedapadu <i>SSC</i>	2021 CGPA: 98

Internship Experience

Talent Trek E-Learning (AWS Partner Network) <i>Machine Learning Intern</i>	Jun 2025 – Sep 2025
---	---------------------

- Developed and evaluated **machine learning models** using **Python**, following workflows for **data preprocessing**, model training, testing, and **performance evaluation**.
- Prepared datasets and analyzed model outputs to assess prediction performance and identify areas for improvement.
- Applied **classification** and evaluation techniques and documented results for technical analysis and presentation.

Projects

AI-Powered Real-Time Online Payment Fraud Detection & Risk Analysis System	Live Demo
- Built an end-to-end fraud detection web application on 1M+ transactions (0.11% fraud), handling class imbalance with stratified splits and class weights, plus engineered balance-mismatch and account-emptied features. - Compared Logistic Regression, Random Forest, and XGBoost; the selected model reached PR-AUC 0.98, precision 0.99, and recall 0.98 on a held-out test set, with a tuned decision threshold and a shared preprocessing module for training/serving consistency. - Developed a FastAPI backend with Pydantic validation, SQLite storage, and 7 REST API endpoints, an interactive Chart.js dashboard, and deployed it using Docker on Render.	

Interactive Quiz Game	<i>HTML, CSS, JavaScript</i>
- Developed a responsive quiz application using HTML, CSS, and JavaScript with multiple categories, difficulty levels, timed questions, and dynamic scoring. - Implemented lifelines, streaks, achievements, multimedia elements, and event-driven JavaScript interactions. - Designed reusable logic for question management, timer control, scoring, and game-state handling.	

Blog Platform Website	<i>HTML, CSS, JavaScript</i>
- Developed a responsive blog platform using HTML, CSS, and JavaScript for creating, managing, and displaying blog content. - Implemented interactive frontend components and JavaScript-based functionality for a structured, user-friendly experience. - Focused on responsive design and clean content organization across screen sizes.	

Technical Skills

Programming: Python, Java (Basics)

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Problem Solving

AI/ML: Machine Learning, Artificial Intelligence, Generative AI, XGBoost, scikit-learn, Pandas, NumPy

Backend & Web: FastAPI, REST APIs, HTML, CSS, JavaScript

Database: SQL, SQLite

Tools: Git, GitHub, VS Code, Docker, Render

Certifications

Introduction to Python – Infosys Springboard | Artificial Intelligence Fundamentals – IBM | Machine Learning Internship Certificate – AWS | Web Development – AWS | Introduction to Operating Systems – NPTEL | SQL and Database Management Systems – EduSkills | ServiceNow Certified System Administrator (CSA) | ServiceNow Certified Application Developer (CAD)

Extracurricular / Hackathon

National Level 24-Hour Hackathon – Agentic AI	Mar 2026
Collaborated with a team to design and develop an Agentic AI solution, contributing to solution design, implementation, testing, and presentation within 24 hours.
